

- Allows generator exhaust system to **seamlessly integrate** into the generator itself
- Generator set's crucial lift muffler and gas water separator to be placed entirely inside the sound enclosure **saving space**
- **Water outlet and dry, cold exhaust hose** are the **only connections necessary** outside of the enclosure
- Turnkey builder installation **simplifies engine room** lay out and **maximizes space**
- All **components are reinforced** and connected to minimize machine motion-related stress
- Internal volumes and component placements have been **carefully designed to provide maximum protection** from water intrusion
