Northern Lights Announces Release of 30 kW Generator

SEATTLE, WASHINGTON (USA) – Leading marine power generation and climate control products manufacturer Northern Lights, Inc. (NLI) is pleased to announce we have just released our 30 kW generator sets. The unit – M944W3F – is:

- USEPA Tier III
- Passive emissions reduction - no extra sensors, coolers, EGR or expensive VGT Turbochargers needed = less costly maintenance, troubleshooting or repair.
- Standard engine, modified timing - same spare parts as before, no expensive HPCR fuel system = no additional special tools required.
- Partial Flow exhaust after treatment - always allows exhaust through, will not "plug". Allows for a compact package with no additional monitoring required = keeps with NL heritage of Simple, Durable, Reliable.

For more information about Northern Lights and Technicold products, visit www.northernlights.com and www.technicold.com.
