

DECONTAMINATING LAKES AND RIVERS ON THE SCAVENGER 2000

The Scavenger 2000 is an effective pollution control and water maintenance vessel.

It was designed to clean and rejuvenate waterways such as lakes, river, harbors, bays of industrial waste water in order to promote healthy and safe environments.

The onboard plant treats mobile contaminated liquids, providing healthy and safe water in developing nations. The critical work that the Scavenger 2000 performs is powered by a clean, reliable Northern Lights M673L3 generator set.
